

Toon Boom Studio v1.1 for OS X Launched!

Montreal (January 31, 2002) - Toon Boom Technologies is pleased to announce the launch of Toon Boom Studio version 1.1 optimized for Mac OS X version 10.1. This upgrade release includes some exciting new features, including export to iMovie projects, as well as a number of Aqua user interface improvements.

With version 1.1, you will now be able to output a new animated iMovie project or add your animation to an existing iMovie project. These new output options open up at least two new opportunities for iMovie users. You can now use iMovie to add titles, transitions, or effects to your animated movie. Or you can jazz-up your home movies with animated clips.

Version 1.1 also features an enhanced Aqua interface which includes customizable toolbars at the top of each window instead of floating tool palettes.

Additionally, Toon Boom Studio's screen layouts and utility palettes have been optimized and redesigned to provide much more on-screen work space. Other improvements include full dual monitor support and custom screen arrangements for the wider G4 PowerBook and Cinema displays.

This new version is available in the Apple Stores as well as on our Web site at toonboomstudio.com. The Japanese version of Toon Boom Studio v1.1 will be available in Spring 2002.

The award-winning Mac OS X edition of Toon Boom Studio including version 1.1 was developed by The Software MacKiev Company (<http://www.mackiev.com/>), based on the original version created by Toon Boom Technologies Inc. Their expertise in developing for the Mac platform enabled a quick turnaround time for this release and ensured that Toon Boom Studio takes full-advantage of the power and elegance of Mac OS X.

About Toon Boom Technologies Inc.

Based in Montreal, Canada, Toon Boom Technologies Inc. is a world-leading supplier of 2D animation software for businesses and individuals.
